Projects

EMPLOYEE DETAILS AND TIME SHEET MANAGEMENT.

 1.EMPLOYEE MANAGEMENT - which contains 7 forms are basic, contact, education, experience, bank, nominee details and document uploads. User have to fill the required forms in appropriate fields in all the forms, we gather all the necessary information about the employee and then the collected data's are validated and it stored in Database by the employee micro-service and documents are stored in s3 repository through content micro-service. User can modify their information also.

 2.TIME SHEET MANAGEMENT - which handles with the employee's attendance and leave information. Employee's have to complete and submit the time Sheet for the respective weeks, then team lead have to approve/reject the request. Then the past records and to do list has already stored in database ,the micro-services retrieve the database and which is render in respective view.

VERIZON ECOMMERCE WEB APPLICATION :

 POS - Verizon Ecommerce web application , which is build using North star architecture and it has many layers SOE , SOI , SRE , CXP , PEGA . User can login using MDN and order the products . The request is verified and authenticated in access gateways. The calls are managed and routed using aggregate services and in customer experience layer (CXP) the business logics are handled to read and write data from DB. In PEGA layer they are tracking the orders , shipping, delivery of the products of the end users.
